Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX.*

	PAGE	
BIRKHOFF, G. D., A Theorem Concerning Uniform Convergence,	90	(Apr.)
BLISS, G. A., The Solutions of Differential Equations of the First Order as Functions of their Initial Values,	49	(Jan.)
BÔCHER, M., Linear Differential Equations with Discontinuous Coefficients,	49	(Apr.)
DICKSON, L. E., Application of Groups to a Complex Problem in Arrangements,	31	
——, On the Real Elements of Certain Classes of Geometrical Configurations,	141	
DOWLING, L. W., On the Conformal Representation of Certain Isosceles Triangles upon the Upper Half-Plane,	69	(Jan.)
FITE, W. B., Note on the Continued Product of the Operators of any Group of Finite Order,	7	
GILMAN, F., The Ballistic Problem,	79	(Apr.)
HUNTINGTON, E. V., The Continuum as a Type of Order: an Exposition of the Modern Theory, I-IV,	151	
LENNES, N. J., Remarks on a Proof that a Continuous Function is Uniformly Continuous,	86	(Jan.)
MACLOSKIE, G., A General Method of Evaluating Determinants,	30	
MILLER, G. A., On the Subgroups of an Abelian Group,	1	
——, Groups of the Fundamental Operations of Arithmetic,	41	(Apr.)
MORITZ, R. E., Some Physical Solutions of the General Equation of the n^{th} Degree,	64	(Apr.)
PIERCE, A. B., The Necessary and Sufficient Condition under which Two Linear Homogeneous Differential Equations have Integrals in Common,	17	
PORTER, M. B., On Functions Defined by an Infinite Series of Analytic Functions of a Complex Variable,	45	
——, Concerning Series of Analytic Functions,	190	
SAUREL, P., On Integrating Factors,	185	
WILSON, N. R., Reduction of an Elliptic Integral to Legendre's Normal Form,	9	

The unfortunate duplication of paging in the January and April numbers is due to the fact that throughout the April number the page-numbers are 48 too small.
